

Project Sheet

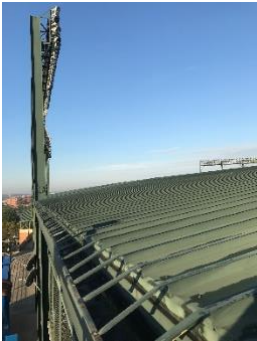

Maryland Stadium Authority
333 West Camden Street
Suite 500
Baltimore, MD 21201

Contract Amount: \$ 305,257.28

Project Description:

Taggart Brown & Associates, Inc., successfully completed repairs to over 55 parapet roofs, 1,300 LF of 8" gutters at the upper deck canopy and repaired the gutters on all 3 elevator towers. The work was challenging due to the height of the structure being over 135'. Scaffolding and mechanical lifts were used to provide safe working areas. Critical facility areas were protected while installing a new roof over the control room for all lighting at the stadium complex insuring operational stability. Certain specified products were found to be incompatible. Working with all stakeholders, we provided enhanced solutions protecting all stakeholders.

Taggart Brown & Associates, Inc. is a General Contractor headquartered in Baltimore, Maryland. Founded in 1991, the company installed residential roofing and grew into a full service residential and commercial building contractor. In 2015 the company re-branded after being awarded its 8(a) and MBE designations. The company has grown into a regional operation serving the Delmarva region and is currently expanding further.
