<u>Location:</u>	Hangars 19 & 20, Joint Base Andrews, MD 20762
<u>Start:</u>	NTP Issued – March 30, 2022
<u>Completion:</u>	IN PROGRESS
<u>Cost at Award:</u>	\$1,150,244.70
<u>Cost at Completion:</u>	IN PROGRESS
<u>Prime Contractor:</u>	Taggart Brown & Associates, Inc.
<u>Subcontractor(s):</u>	BOPAT Electric

Taggart Brown & Associates was awarded the contract to upgrade the lighting systems at Hangars 19 & 20 at Joint Base Andrews. These hangars are the current home of America’s fleet of VC-25A aircraft and serve the nation’s highest-ranking officials in their diplomatic affairs. Due to the sensitive nature of this facility, no photography is permitted. The work consists of the replacement of existing high-pressure sodium (HPS) and metal halide (MH) lights on the interior spaces and exterior aprons of the facility. The new lighting system is entirely comprised of the highest-efficiency, most cutting-edge LED lights available designed to meet the exacting needs of the Air Force. For more information, please contact Kerryn Loan, Contracting Officer.
