Taggart Brown & Associates removed a 42” diameter bronze seal (Department of the Interior) from a marble floor at the entrance to an office building. The seal was approximately 3” thick, weighing over 250 Lbs. Once the seal was removed, we built a wooden crate on site to protect the seal and transported it to a DOI archive location in Prince Georges County, Maryland. The floor area was also infilled with a temporary, smooth plywood base to mitigate the trip hazard.
