| <b><u>Prime Contractor:</u></b>   | Taggart Brown & Associates, Inc.                                       |
| <b><u>Subcontractor(s):</u></b>   | Fence OKC  |

The SWPA’s Gore facility and associated substation serves the Webbers Falls Powerhouse and portions of Muskogee & Sequoyah Counties. Taggart Brown & Associates was contracted to replace and improve the perimeter security of two properties in full. The scope of this project encompasses sliding gate replacement, gate operator replacement, and the installation of new fencing. New fencing includes Ameristar Impasse II palisade fencing and heavy duty 8’ chain link fence with concertina wire, barbed wire, and concrete-filled posts. Length of fencing to be replaced totals over 3,000 linear feet and all work will be completed under winter/early-spring conditions. No photos provided for security purposes.
