Title: Cyclic Repair & Replacement of Elevator Controls
Location: Independence National Historic Park, Philadelphia, PA
Start: October 13, 2022
Completion: IN PROGRESS
Cost at Award: \$2,542,571.74
Cost at Completion: IN PROGRESS
Prime Contractor: Taggart Brown & Associates
Subcontractor(s): Wyatt Elevator, Marano Electric, Lighthouse Design

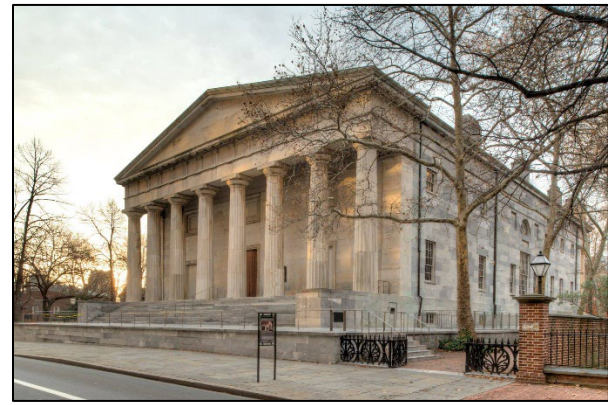

Taggart Brown & Associates was awarded extensive repairs and maintenance to several elevators across six (6) facilities at Independence National Historic Park in Philadelphia. In addition to A-E services, we are removing and installing new main controllers, door controllers, pump units, disconnect switches, starter panels, conduit & wiring, in-ground cylinders, lighting fixtures, and life safety fixtures such as pit ladders and fire suppression. In addition, one elevator is being removed in its entirety and a new enlarged one installed to meet ADA compliance regulations. Minor interior wall and ceiling repairs are also included in this project. Below are photographs of the facilities in which the elevators are located.
